Description

Our industrial equipment Piranha Tether securely fastens to your belt-loop, jacket, tool belt or anything you'd like to clip it to. The clamp on the other side will safely and securely hold something until you're ready for it again. Great for gloves, hats, shoe covers, keys, or anything else you need to keep handy!

Unlike similar products, we created the Piranha Tether with the highest quality parts in order to make it the toughest tether available today.

The clip that attaches to your belt-loop is made with a heavy gauge steel which is nickel plated to protect against weathering. This clip meets military specifications and is widely used by policemen nationwide to securely attach keys to their uniform. It is rated to hold 75 pounds and measures 2 ½" in length and 1" wide where the strap is inserted. Both the clip and clamp are corrosion resistant.

Another reason we've selected this clip for the Piranha Tether is because it does not have a swivel base. Swivel clips on similar products allow whatever is below the clip to spin in a circle as you move around. The clip on the Piranha is stationary and will securely hold your items in place.

The strap that we've selected for this tether has a very light stretch for safety.

We have kept the strap short so that your items aren't hanging too far down, potentially becoming a safety issue. It's also short enough to keep your items out of the way and reduces any swinging motions.

The clamp used to attach your items is a spring action steel clamp that is also nickel plated to protect the metal. The teeth on the clamp will grab and hold your equipment, but will not pierce or damage the item you've secured. It offers a quick release function that is thumb trigger activated.

Pricing:

1 Piranha Tether | \$9.50 each

2 Piranha Tethers | \$8.50 each

Piranha Glove Tether Leash with Multi-Use Clip

3 or more Piranha Tethers | \$7.75 each

I use these on my shoe covers and I haven't lost a pair since I bought this clip. Nicely made.
